

## The Frog Boat™

**Fish all day long** – there's lots of room for your cargo and catch – and a safe spot to put your rod! The Frog Boat's **sleek design** and **stable platform** makes it an ideal choice for fly fishers, hunters and bass fishers.

**Carry it to the water with ease;** use it for fishing, use it to discover and explore new shorelines, or use it to swim from. **Row it; motor it; portage it.** So lightweight you'll hardly notice it!

**Unique and innovative,** THE FROG BOAT is the first choice of people who work hard and play harder. Nothing else like it exists. Safe, virtually untipable and unsinkable, THE FROG BOAT is tough. Even when the weather gets rough it stays afloat, on course and will bring you home.

Low wind drift coupled with our unique **hydrodynamic hull** makes The Frog Boat fast while using less energy. When powered with an **environmentally sound** electric motor, The Frog Boat leaves only a tiny 'frogprint' on the water's ecosystem.

**Rugged and lightweight.** True to its amphibious nature, The Frog Boat's strength is its maneuverability in the water, and its ease of transportation over land.

As a first boat, or an additional boat to take and go, The Frog Boat's ingenious design and leading edge technology mean easy, safe and practical boating. **It's a must-have for your next fishing, camping or family adventure!**

### Sleek, Stylish, Lightweight & Playful

**Compact and lightweight,** The Frog Boat is easily transported on most existing roof racks, on your SUV, family sedan, on the back of or even inside your camper. The Frog Boat **sets up in seconds** and its generous carrying capacity ensures all your important cargo has room to go along too.

**Rugged | Lightweight | Maneuverable**  
**Portable | Roomy | Comfortable**  
**Safe | Affordable | Unique | Versatile**

## Hatching The Frog Boat™

**A Fisherman's Dream**  
 "Completely at one with nature with a great sense of belonging, I envisioned myself in The Frog Boat in harmony with the environment. The concept, the theory, the storyline, and the timing all came to me at once. The Frog Boat would have legs (pontoons) and be one of the most stable, versatile boats available. The experience was almost magical; it was tranquil, peaceful, and left me with a feeling of well-being and safety."

Michael Reilly  
*The Frog Boat Inventor*
